## DETAILED ACTION

1. The amendment filed on 12/16/05 has been fully considered and made of record.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Mowatt et al (US 5,306,670).

**As applied to claim 1**, Mowatt et al teach a method of fabricating multi-chip integrated circuit module, comprising:

- forming a laminate base structure (Fig. 4, 16) having plated through holes (Fig. 4, 54) for introducing press-fit elements (Fig. 7, 152);
- forming a laminate cover structure formed from organic multilayer thin film packages (Fig. 4a, 10' & 10'') providing very fine conducting paths (Fig. 4c, 12) and having a top mounting plane for mounting chips (Fig. 4a, DIE); and

- forming a hybrid structure (Fig. 4a, items 16, 10' & 10'') comprised of said laminate surface structure (Fig. 4a, 10') and said laminate cover structure.

**As applied to claim 2**, Mowatt et al teach a method of fabricating multi-chip integrated circuit module, comprising:

- forming a laminate base structure (Fig. 4, 16) having plated through holes (Fig. 4, 54) for introducing press-fit elements (Fig. 7, 152);
- forming a laminate cover structure formed from organic multilayer thin film packages (Fig. 4a, 10' & 10'') providing very fine conducting paths (Fig. 4c, 12) and having a top mounting plane for mounting chips (Fig. 4a, DIE); and
- forming a sandwich structure (Fig. 4a, items 16, 10' & 10'') being comprised of said laminate surface structure ((Fig. 4a, 10')) and said laminate cover structure, whereby said structures are subsequently mechanically and electrically conductive connected to each other through adhesive (Fig. 4a, 26) and plated through holes.

### ***Response to Arguments***

4. Applicants' arguments with respect to claims 1 and 2 have been considered but are moot in view of the new grounds of rejection or objection.

*Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure.

Applicants' amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
